

Iskra Antenna Systems

Your Connection to the World

For over 70 years, Iskra has specialized in high-performance antenna solutions for television, radio, mobile communications, wireless networks, and industrial applications.

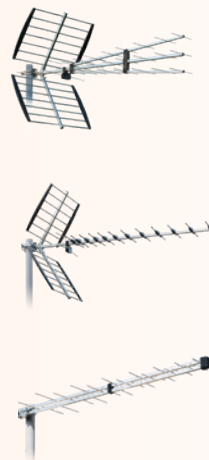

Our comprehensive portfolio is fully developed and manufactured in Europe. Partner with Iskra for proven reliability and a secure, dependable supply chain.

Terrestrial TV Antenna Portfolio

A superior range of DVB-T/T2 antennas engineered for professional installers, ensuring maximum performance and low return rates.

→ A complete, technically superior solution for all residential, apartment and professional applications.

DVB-T / T2 & HDTV Optimized	Fully compliant for all UHF/VHF digital broadcasts.
High-Rejection 5G/LTE Filtering	Integrated passive or active filters prevent mobile interference for ultimate signal integrity.
Durable Construction	High-grade aluminium & UV-resistant materials ensure long-term field reliability.
Installer-Focused Design	Tool-free assembly saves installation time and labour costs.
Wide Range of Models	High gain Yagi Antennas – for extreme long distance. Broadband Log-Periodic Antennas - ideal for receiving signals from multiple transmitter locations.

Radio FM & DAB/DAB+ Solutions

Expand your audio portfolio with our reliable range of FM & DAB+ antennas for residential and professional applications.

→ An easy-to-stock line for the growing high-fidelity radio market.

Full Band Coverage	Engineered for all FM and DAB/DAB+ frequencies.
Versatile Models	Omni-directional and directional options with vertical/horizontal polarization in both Yagi and Log-periodic variants.
Built for Longevity	High-quality, durable materials for a long service life in all weather conditions.

Antennas for Data & IoT Networks

Capitalize on the growth of wireless data. Our antennas offer robust connectivity for the expanding 5G, LTE, and IoT markets.

→ A future-proof portfolio for next-generation wireless and IoT projects.

Multi-Standard Portfolio	Covering 5G/LTE, TETRA, Wi-Fi, LPWAN (LoRa), and other IoT protocols.
High-Throughput Engineering	High gain and efficiency with MIMO options to maximize data rates and reliability.
Complete Solutions and Flexibility	Different cable lengths / connector types on request, accessories (wall mounts, cable extensions).
Ruggedized for Deployment	Robust, mission-critical appropriate industrial and outdoor use.
Key Markets	Mobile Broadband, Fixed Wireless Access (FWA), Industrial IoT (IIoT), Smart Metering, Telematics, Defence.

The Iskra Advantage: A Partnership for Growth

70+ Years of Proven Expertise:	A market-leading brand synonymous with quality.
Made in Europe:	Superior quality and a secure, stable supply chain.
In-House R&D and Production:	Openness for customised solutions and OEM
A Dedicated Partner:	We are committed to the long-term success of our distribution partners.
